

HELPFUL HINTS FOR USING TAPESTRY CROCHET (SINGLE CROCHET) WITH MY GRAPH PATTERNS:

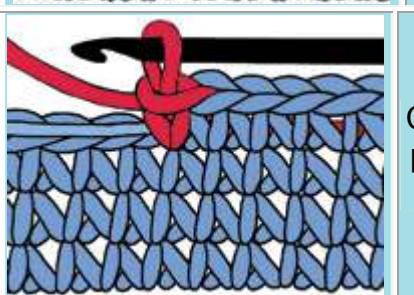

Single crochet across as usual, keeping the carried yarn on top of the loops, crocheting under and over it. If done correctly, the carried yarn will not be visible from either the front or the back of the work. After the round has been completed, the one inch tail (that was left sticking out of the back of the piece) can be snipped off. More than one color yarn can be carried at the same time for a multicolored tapestry crochet motif. Each yarn carried will slightly increase the height of the single crochet stitch. For a consistent appearance, start to carry the yarn at the beginning of a project, even if there will not be any color changes for a few rounds.

The **tapestry crochet stitch** is similar to the single crochet stitch. One or more yarns are carried while a yarn is being crocheted. You have to plan ahead with the tapestry crochet stitch, though, because the yarn switch occurs while two loops of an incomplete crochet stitch are still on the hook.

Make the final yarn over and loop with the carried yarn.

Continue to crochet across while carrying the previously crocheted yarn, until another yarn change is desired.
